ADVANCED CLINICAL TRAINING IN PEDIATRIC DENTISTRY

Program Overview

Director: Francisco Ramos-Gomez, DDS, MS, MPH
The Pediatric Dentistry Advanced Clinical Training Program provides an opportunity for foreign-trained dentists to return to an academic setting with postgraduate training. This highly sought-after program supplements the knowledge and experiences gained from earlier training and subsequent professional experiences. The program includes:

- Weekly rotations at Venice Family Clinic
- Possibility to perform patient treatment
- Opportunity to audit all courses offered by the Section of Pediatric Dentistry during enrollment
- Participation in Craniofacial Clinics, Infant Oral Care Program, Intravenous General Anesthesia and Medical/Dental Interprofessional Training

Course Topics

- Oral Pathology
- Histology & Embryology
- Growth & Development
- Interceptive Orthodontics
- Behavior Management
- Preventive Dentistry
- Minimally Invasive Dentistry
- Pediatric Diagnosis & Treatment
- Sedation and Anesthesia
- Pediatric Medicine
- Practice Management
- Research Methodology

Program Options

- One-year program beginning in the Summer Quarter. One-year certificate awarded upon completion.
- Option to extend for a second year. Two-year certificate awarded upon completion.
- One, two, or three-quarter Preceptor Program Certificate.
