

Advanced Clinical Training in Pediatric Dentistry

The Pediatric Dentistry Advanced Clinical Training (ACT) Program provides foreign-trained dentists who wish to return to an academic setting with postgraduate training. This highly sought after program supplements the knowledge and experiences gained from earlier training and subsequent professional experiences

- Rotate weekly at Venice Family Clinic and may perform patient treatment
- Audit all courses offered by the Section of Pediatric Dentistry during your enrollment

Course Topics: Oral Pathology, Histology and Embryology, Growth and Development, Interceptiv Orthodontics, Behavior Management, Preventive Dentistry, Minimally Invasive Dentistry, Pediatric Diagnosis and Treatment, Sedation and Anesthesia, Pediatric Medicine, Practice Management, and Research Methodology.

Program Length: 1 year, beginning in the Summer Quarter. **Number of Positions:** Maximum of 4-5 per year **Application Start:** September 15. **Application Deadline:** March 15. Rolling Admission

Trainees participate in:
